PROJECTS

PerkView – Employee Benefits Tracker 2025
Python

- Designed and developed a full-stack application enabling employees to view, track, and manage workplace benefits (health, gym, food allowance, transport, paid leave) in one centralized dashboard.
- Built an admin panel allowing HR to add/edit benefits, assign them to employees, and monitor company-wide spending through detailed usage reports.
- Implemented usage tracking features showing remaining benefit balances and consumption history per employee.

Gym Management System 2025
React Native

- Developing a cross-platform mobile application for managing gym members, memberships, and class schedules.
- Applying OOP principles including inheritance, encapsulation, and polymorphism throughout the architecture.

Personal Portfolio Website 2024 – Present
Next.js, React, CSS Modules

- Designed and built a responsive developer portfolio in Next.js showcasing projects, skills, and contact information with a clean, modern UI.

WORK EXPERIENCE

IT Department Assistant — NASA National Secondary School, Nepal November 2023 – August 2024

- Assisted the IT department in maintaining school computer systems, troubleshooting hardware and software issues, and supporting day-to-day technical operations.
- Performed data analysis tasks to support administrative reporting and school operations.
- Contributed to the development and maintenance of the school website, applying web development skills in a real-world environment.

Shift Supervisor — Shwarma Place, Calgary, AB February 2025 – Present

- Lead shift operations and coordinate a team of staff to ensure smooth, high-quality service during peak hours.
- Train new employees on food preparation standards, customer service protocols, and workplace safety procedures.
- Manage inventory checks, opening/closing duties, and direct communication with management to resolve operational issues.
